

Introducing RCC Returnables

Sustainable System for chemical inventory management!

Now with battery powered pump for ease of use

RCC Returnables

Introducing the RCC Returnables System:

- We use UN rated DOT approved containers that can be reused
- We have our own delivery fleet to allow us to do this
- We deliver our chemicals using these special containers and their capacity size is larger than conventional 5g pails to address resupply feasibility
- Each SKU item you purchase from us has a dedicated station that allows easy dispensing into secondary containers that also are reused
- We use a unique color coding dispensing system to protect your employees
- Our delivery staff show up and grab the empties and replace them with refilled containers and the cycle repeats itself over and over

7.5 gallon
returnable
container

*Either 2.5 gallon or 1 gallon
secondary container for
dispensing at 3-bay sinks or
quick connect to glass washers
or dish washers*
